The Town of Rapid City.

SITUATED on the banks of the Little Saskatchewan River, Rapid City possesses attractions rarely to be found in a prairie country. The many beautiful water scenes in this book prove this and also prove the existence of a great power which only awaits the presence of capital to develop this into the leading manufacturing district of the Province. The river running through the centre of the town affords excellent drainage, making it so healthy that no case of typhoid fever has ever originated in town. The population is 800, and its affairs are directed by a mayor and council. Building material of stone, brick, sand and lime are found in the town limits. Taxes are light, and the financial condition is excellent.

The district around Rapid City affords, in addi-

tion to good soil and abundance of water, grass and hay; cattle-raising and dairying are therefore engaged in with great profit. The farmer can turn his stock into cash at any time, while the creamery takes all the milk produced. Nearly \$100,000 worth of cattle were marketed here last year, and over 65,000 pounds of the finest butter were made. Those farmers who have gone into stock-raising and dairying have grown rich rapidly, and there is yet room for an immense expansion of these industries.

Some choice lands are available at moderate prices, in both improved and unimproved farms. And these lands, which are convenient to market, churches and schools, can be obtained on most convenient terms of easy payments. While this district is essentially a mixed farming district, it also equals and excels in production the very best grain producing areas in Manitoba. Saskatchewan Municipality, in the centre of which Rapid City is situated, ranks

third among the other eighty municipalities in Manitoba in its yield per acre of wheat, while it excels all others in its yield of oats and barley.

WATER POWER.

The Little Saskatchewan River, which runs through the Town of Rapid City, is one of the most valuable assets of the town. Already there is a flour mill and woollen mill in operation here, both of which are operated by power supplied from this river. The woollen mill is operated by electricity from power supplied by a dam about half a mile from the town. Besides the power necessary for the operation of the mill, there will be surplus power which will be used for the purpose of furnishing power for other manufacturing industries as well as lighting the town with electricity. The manufacturers, the miller and the capitalist, are invited to come along and develop the resources supplied by nature along the Little Saskatchewan River running through this district.

Rapid City can be reached by two lines of railway—the C. P. R. from Winnipeg, via Minnedosa, and the G. N. W. C. branch of the same system from Brandon.

The new settlers coming in with moderate means will find it very much more satisfactory and conven-

ient to purchase lands in a settled district than to incur the extra expense of hunting for free homesteads in remote and out-of-the-way places where supplies are so much higher and where markets are at great distances.

The new settler who buys land here has not to wait for years until a settlement grows up around him before he can enjoy the social, educational and commercial advantages of an old settled district.

MIXED FARMING.

As a mixed farming district this has no equal in Manitoba. While many farmers devote their energies entirely to grain-growing, and with great success, still the vast majority believe in mixed farming. Over 250,000 bushels of wheat were marketed here this last season; and as there are no less than six elevators within a radius of seven miles of the town which handled over 500,000 bushels of wheat, it will readily be seen that Rapid City is in the centre of a large grain-growing area.

The fraternal and benevolent societies are represented by the A. F. & A. M., the I. O. O. F., the L. O. L., the A. O. U. W., the I. O. F. and C. O. F.

As an evidence of the growth and progress of the town, mention has only to be made of the number of handsome buildings already erected as well as those in course of erection. A new school costing in the

neighborhood of \$12,000 was erected in the summer of 1902, besides many dwelling houses. Plans are being prepared for many new residences which will be erected during the summer of 1903 and will compare favorably with the residences of many larger and more pretentious towns.

THE RAPID CITY POWER, LIGHT AND WOOLLEN MANUFACTURING CO.

Reference has already been made to the possibilities for the development of the water power on the Little Saskatchewan River—a period in the growth and development of Manitoba and the North-West Territories where the establishment of industries, in certain lines at least, not only becomes an economic necessity to the country, but as well affords a profitable means of investment for capital. The locations offering the greatest number of natural advantages for economic production are destined to become the manufacturing centres of this great west. Rapid City claims, and justly so, to be one of these coming centres. During the fall of 1902 a strong company—The Rapid City Power, Light and Woollen Manufacturing Company—was formed for the purpose of developing a water power adjacent to the town to supply electric light and power at low rates to consumers. The Company are also establishing a woollen

mill. They believe that the conditions prevailing are most favorable to this industry. Large quantities of first-class clothing wool are grown in the Territories to the west. The climatic conditions of the country create an ever-increasing market for woollen fabrics. By manufacturing here, the long freight haul of the raw material to the east, and of the finished product back to the west, is avoided. Cheap power, good water, inexpensive living, pleasant and healthful surroundings, make up a combination not often surpassed. The mill building will house a basement 50x60 ft., first floor 50x50 ft., second floor 27x50 ft. The plans and specifications prepared for placing the machinery show that, for convenience and economical handling of material and goods, it will rank among the first. The Company are also prepared to supply power at most reasonable rates for other manufacturing purposes. They believe there is an excellent opening for a foundry and machine shop, and an unequalled opportunity for the establishment of an oatmeal mill. The Company will be pleased to answer all enquiries as to these or other industries. See page 15.

Messrs. A. F. and A. J. Le Page, of the firm of Le Page Bros., were born in Charlottetown, Prince Edward Island. They started business for themselves in Rapid City in 1898, having bought out the business of Mr. R. J. Hopper. By strict attention to

business their trade increased to such an extent that it became necessary to get a larger store. On completion of the Urpeth Block they leased the corner store for a term of years which they occupy at present. They carry a large general stock, and keep everything that the farmer or incoming settler may require. The management and buying is looked after by Mr. A. F. Le Page, while Mr. A. J. Le Page attends to the book-keeping and financing for the firm. Each department has a competent head who thoroughly understands his respective department. In dry goods this firm carry a well assorted and complete stock in all lines. In men's and women's ready-to-wear garments they handle the very best the country produces. In boots and shoes they are especially strong and have a very large trade, carrying a very complete stock in men's, women's and children's. In groceries their reputation for handling nothing but the best and freshest goods has secured for them the grocery trade of that part of the country. Messrs. Le Page Bros., by looking after the interests of the farmers in giving them good reliable goods at honest prices, buying what they have to sell and paying them the highest possible price, strict attention and a thorough knowledge of the business, have built for themselves one of the largest general businesses in that section of this great western country. See page 17.

The Union Bank, whose headquarters are at Quebec, established a branch here about a year ago, purchasing the banking business of D. A. Hopper. This bank was the first institution of its kind to open branches in the smaller towns throughout Manitoba, thereby expressing their confidence in the future stability of this Province. Their business here has increased rapidly, and already the office staff has had to be increased. The capital stock of the bank is \$3,000,000, of which \$2,250,000 is subscribed and \$2,236,000 is paid up. The bank has sixty-nine branches in all, between forty and fifty of which are located in Manitoba and the Territories. For the accommodation of settlers and others coming into districts where it would be most convenient for them to deal with their different branches, they have established a system of banking by mail. Deposits are received and pass books and cheques are sent by return mail. This system is in force in all their branches. A savings bank is established at all branches, where deposits of \$1 and upwards will be received and interest allowed thereon. Mr. S. T. Hopper is the popular and energetic manager of the bank at this point. See page 19.

The Rapid City brickyard, which is owned by R. Hales, is one of the chief industries of the place. No difficulty is experienced in securing a market for the product of the kilns; the great difficulty is to supply

the orders received. Already enough orders are booked to keep the kilns busy all season, and the proprietor has been forced to enlarge his capacity with prospects of being forced to do so again shortly. During the summer months employment is given to about thirty hands, all of whom receive good wages. See page 21.

James White.—This is the oldest hardware business in town, having been opened by the present proprietor some fifteen years ago. Mr. White carries a large and varied stock, and has had a very successful business career. In addition to his hardware business he also handles implements and lumber. See page 23.

The Queen's Hotel, a large three-storey brick building, is one of the most popular hotels in the Province. The hotel was just recently built and is newly furnished throughout. The proprietor, Mr. Thos. Evoy, is well and favorably known to the travelling public, and endeavors to make all visitors comfortable. The Queen's makes a special bid for commercial trade, and, having several commodious sample rooms, besides running a free omnibus to the depot, secures a large share of it. See page 25.

Thos. Houlding, general hardware merchant, carries an immense stock of domestic and builders' hard-

ware, all descriptions of blacksmith supplies, glass, paints, as well as a large stock of sporting goods. They are agents for the celebrated "Jewel" and "Majestic" ranges, which are noted as being among the best on the market to-day. His store is in the Urpeth Block, and is one of the best stands in town. See page 27.

The Reporter.—This newspaper, published weekly, was founded by the present proprietor, Mr. H. C. Clay, who purchased the *Spectator* and *Vindicator*, amalgamating them under the present name. *The Reporter* has passed through the various vicissitudes common to newspapers, but is to-day in a prosperous condition and is steadily increasing in circulation and usefulness. The office is thoroughly equipped for handling job work of all descriptions, and is fitted up with the latest labor saving and up-to-date machinery. See page 29.

Geo. McCulloch & Co., flour mills.—This firm has a perfectly equipped mill, with a capacity of 200 barrels a day. The machinery is all new and up-to-date, and a first-class grade of flour is manufactured. In addition to their large customs trade they have extensive connections in the east, and are continually shipping large orders of the higher grades to the eastern provinces. During the past year extensive alterations were made in the interior of the mill, and it is

now equal to any in the Province. It is one of the principal industries in the town, and employs a large number of hands all the year round. Mr. Hugh McCulloch is manager of the business here. See pages 30 and 31.

J. G. Hindson.—This firm is well and favorably known throughout this section of the country as one of the most reliable and up-to-date houses in town. By straightforward and upright dealing Mr. Hindson has won the confidence of the people of this community. He carries a large stock of general merchandise, including dry goods, groceries, boots and shoes, etc.; quality and value are, however, of first importance. His store, which is located in the Urpeth Block, is one of the finest in town. Mr. Hindson is at present Mayor of the Town. See page 33.

J. R. Burland, furniture dealer, carries a large and fashionable stock of all kinds of furniture and bedding, wall papers, etc. He makes a specialty of picture framing and carries a large stock of choice engravings and water colors. In addition to his furniture business Mr. Burland carries on that of undertaker and embalmer. See page 35.

Dr. R. P. Crookshank & Co., druggists.—This firm is one of the old established business places of this town. The business was established by Dr. R. P.

Crookshank shortly after his arrival here in 1886. In addition to the usual line of drugs and perfumes found in a well stocked pharmacy, they carry a full line of stationery as well as the leading magazines and periodicals. The doctor, in addition to his drug business, enjoys a large and extensive medical practice. He takes an active part in some of the fraternal societies, and also in civic matters. See page 37.

Mr. D. McNaught, lumber dealer, is one of Rapid City's oldest and most progressive business men. He came to Rapid City in 1881 and opened out in the livery business. He continued in this line for some years after which he carried on farming operations for a number of years. About three years ago he disposed of his farm and moved into town, opening up in the lumber business. Besides handling all kinds of building material Mr. McNaught is agent for the Galt Coal Company and has the exclusive agency for that company's coal in this town. Mr. McNaught takes an active interest in municipal and Provincial politics and was twice elected in the Liberal interests for the local Legislature in the constituency of Saskatchewan. See page 39.

Mr. A. A. Lundy, implement dealer, came from Winnipeg to Rapid City about eight years ago and opened out in the blacksmith business. About two years ago he disposed of his blacksmith shop and ac-

cepted the agency for the Frost & Wood Company, manufacturers of farm implements. Mr. Lundy's business has increased rapidly and he has recently erected a large implement warehouse. See page 41.

Murray & Beattie.—Although only recent arrivals in Rapid City the firm of Murray & Beattie are determined to do their share of the trade. They purchased the general store business of Mr. J. J. Moore, on Fourth Street, and have made extensive additions to the stock, which consists of everything usually found in a well conducted general store. As they buy for cash they are enabled to save large discounts, thus being able to give many bargains. See page 43.

Messrs. Milne Bros., whose large warehouse on Second Avenue is crowded to the doors with implements, do one of the largest businesses in town. They handle many different lines of goods, among them being the Deering binders, mowers and rakes, Cockshutt and Canton plows and J. I. Case threshers. In addition to their implement business they own an elevator at this place and are large buyers of grain. See page 45.

Mr. E. C. Gossett-Jackson, lumber and implements.—Mr. Jackson is agent for the well known McCormick binders, mowers and rakes, as well as the Sylvester seed drill. From a small beginning this business has grown until now it is one of the largest

on this line of railway. If you contemplate purchasing an implement of any sort or erecting any manner of building he can undoubtedly suit you. See page 47.

Mr. Alex. McKellar, whose handsome residence is shown on page 47, is one of the earliest settlers of this district. For a number of years after coming to the Province Mr. McKellar engaged in farming operations, but for the past twelve years has been associated with Mr. E. C. Gossett-Jackson in the lumber and implement business here. This partnership has lately been dissolved and Mr. McKellar purposes engaging in the lumber business at Pettapiece, which is located on the North Central branch of the C.P.R., about nine miles west of Rapid City.

Edward Stout, who has recently established a livery, feed and sale stable in town, is working up a splendid business. Mr. Stout is fond of a good horse himself and those who patronize his stables will be sure of a first-class turnout. In addition to his livery business Mr. Stout is an extensive farmer as well as the owner of the Urpeth Block, the principal business block of the town. See pages 48 and 49.

J. A. Moxley & Co., hardware and tinware.—Although only about three years in business Mr. Moxley has succeeded in working up a lucrative trade.

Although he carries a general hardware stock, particular attention is paid to tinsmithing and repairing. His shop is on Second Avenue, directly opposite the Queen's Hotel. See page 51.

Daly & Murray.—This firm do a very large real estate and insurance business. They are agents for the New York Life Insurance Company as well as fire insurance. They have recently issued a very complete list of farms which they have for sale, including both improved and unimproved properties. Parties who contemplate purchasing land in this vicinity will be shown any of the lands listed by this firm free of charge. In addition to his real estate and insurance business, Mr. Daly, the senior member of the firm, is police magistrate and clerk of the town. See page 53.

The Windsor Hotel is situated near the C. P. R. Depot. It has been newly refitted and furnished throughout and is one of the best dollar a day houses in Manitoba. The proprietor, Mr. A. D. Brown, is one of the best known hotel men in the Province and if you call on him he will do his utmost to give you satisfaction. There is an excellent sample room in connection with the Windsor, and it is convenient to the business part of the town and yet retired. See page 55.

Dr. W. W. Bride, who commenced business here in the fall of 1899, has succeeded in building up a good practice. The doctor is a graduate of Manitoba College as well as the post graduate school of Chicago. See page 57.

The Public School.—This handsome building was erected in 1902 and cost, thoroughly equipped, in the neighborhood of \$12,000. The principal is Mr. G. Sproule, B. A., who is supported by a very able staff. This school has always been noted for the very thorough manner in which its students were trained and some of the leading educationalists and professional men of the Province received the preliminary portion of their education in this town. At present scholars are received only as high as the third class work, but it is the intention of the school board to engage another teacher after midsummer and then second and third class work will be taught. See page 58.

W. F. Rook, druggist, is one of the enterprising young business men of this town. He carries a large stock of drugs and stationery, also a fine assortment of photographic supplies. Mr. Rook makes a specialty of Kodaks and supplies for same. See page 59.

Mr. G. L. Stone, whose residence is pictured herein, is one of Rapid City's earliest settlers and ranks among its leading business men. For a number of

years Mr. Stone was the local representative of the Massey-Harris Company, and about two years ago was promoted to the position of general travelling agent, with headquarters in Rapid City. He takes an active interest in civic affairs and has at different times occupied a position on both the town council and school board. See page 61.

Mr. J. H. Martin, scenes from whose farm appear herein, came to Manitoba in 1878, from Guelph, Ont. Upon his arrival here he took up a homestead, but during the first winter he worked at his trade, that of a carpenter, erecting houses for his neighbors in the district. Through good management and careful judgment Mr. Martin has worked into a fine lot of stock, besides having improved his property. He soon found it necessary to have more land, and accordingly bought another quarter section. His farm is situated three miles north of Rapid City, in one of the most pleasant locations to be found in a day's travel. During the year 1900 Mr. Martin had the misfortune to have his dwelling burned, but in its place he has erected a beautiful brick residence, which for design and workmanship is not to be surpassed, the estimated cost of which is \$1,800. He has also a fine barn fitted with a wind mill which enables him to do his own chopping. Land in this vicinity is worth from \$12 to \$15 per acre, and consists of fine

black loam with clay subsoil. Mr. Martin's stock consists of nine head of cattle, seven head of horses, besides pigs and poultry. During the past year he had 170 acres under crop from which he secured 1,980 bushels of wheat and 2,500 bushels of oats. This year he has about 220 acres under cultivation. He is well satisfied with his success in Manitoba and is under the impression that any person willing to work and who is a good manager can make a home in this country. Mr. Martin's farm is estimated as being worth \$7,000. See page 63.

Geo. McWilliams, blacksmith, came to Rapid City about four years ago, buying out the business of the late Fred. Zimmer. Since then the business has steadily increased and Mr. McWilliams has been compelled to make a large addition to his shop, besides installing new and up-to-date machinery. Mr. McWilliams makes a specialty of horse shoeing, being one of the best in the Province, and many horsemen come from neighboring towns with their horses in order to have them properly attended to. See page 65.

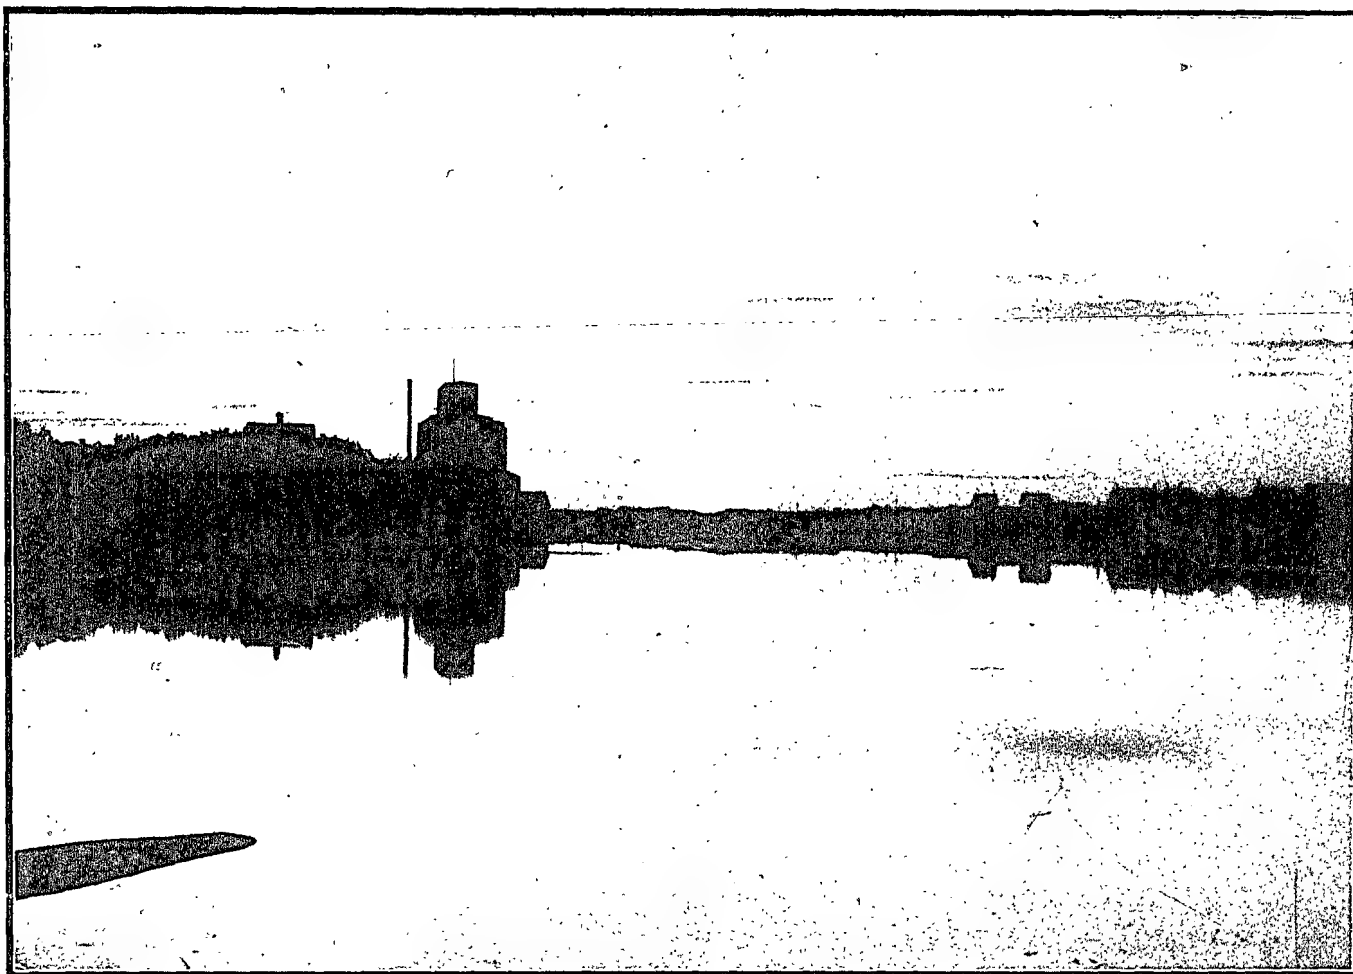

Mr. J. B. M. Dunoon, postmaster, has earned for himself the reputation of being the most obliging postmaster in the Province. No matter how busy he may be he is always ready and willing to impart information regarding the mail service to strangers and others who may require such. Mr. Dunoon is

very public spirited and takes a great interest in anything pertaining to the welfare of the town. He is secretary-treasurer of the Driving Park Association and is an active member of the majority of the fraternal and secret societies in this place. See page 67.

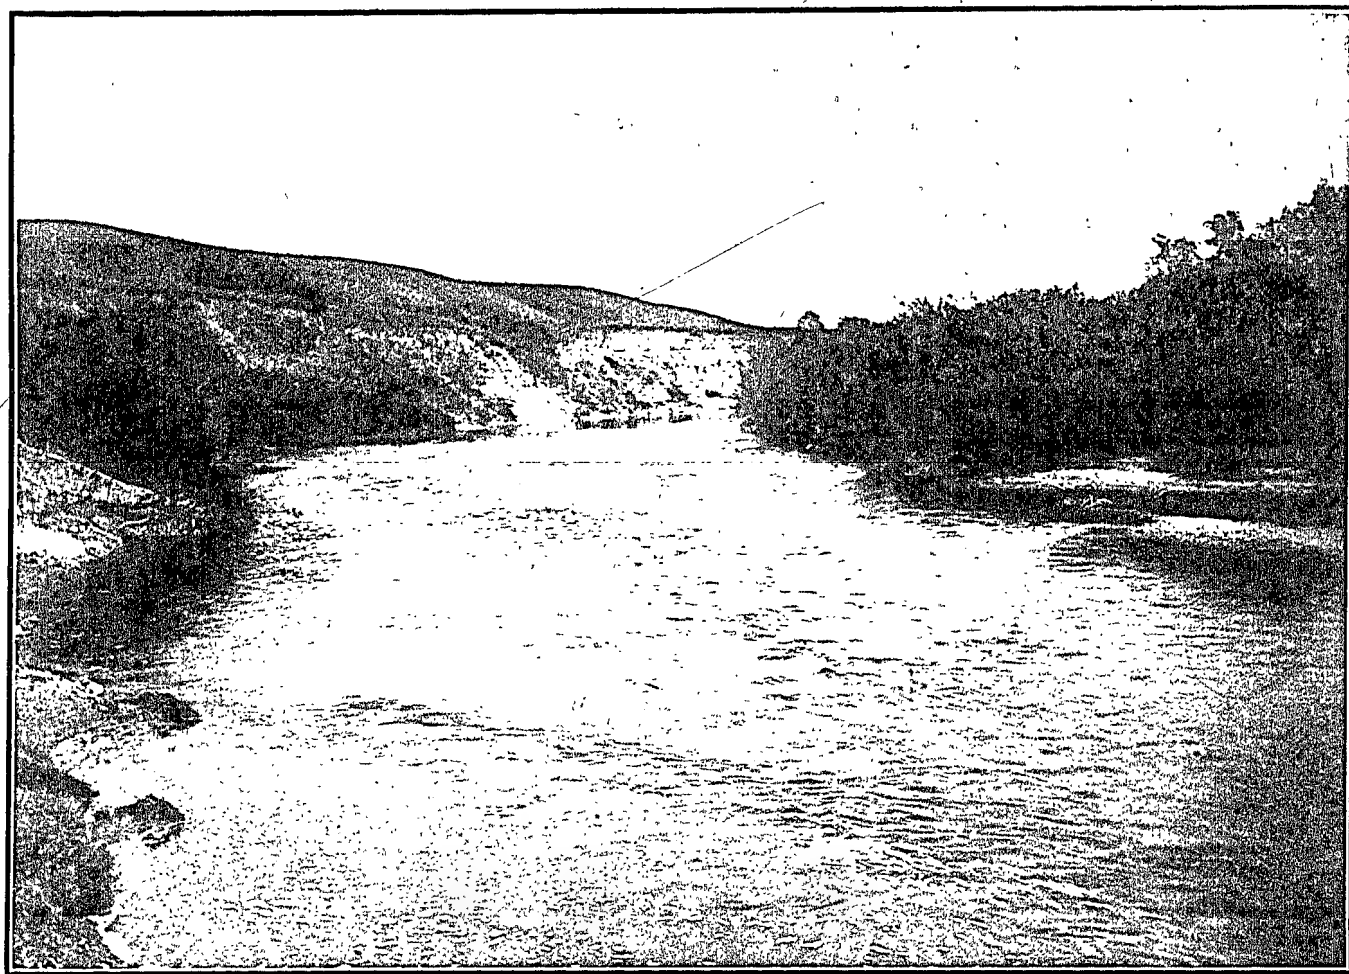

The residence of Mrs. Fred. Zimmer, which appears herein, has lately been disposed of to Mr. Wm. Dick, of the firm of Manley & Dick. Mrs. Zimmer has purchased two fine lots on the corner of Fourth Street and Fourth Avenue and will build a handsome brick residence thereon this coming summer.

She is the widow of the late F. Zimmer, blacksmith, of this place, who was one of the earliest settlers in the Rapid City district and large property owner. See page 68.

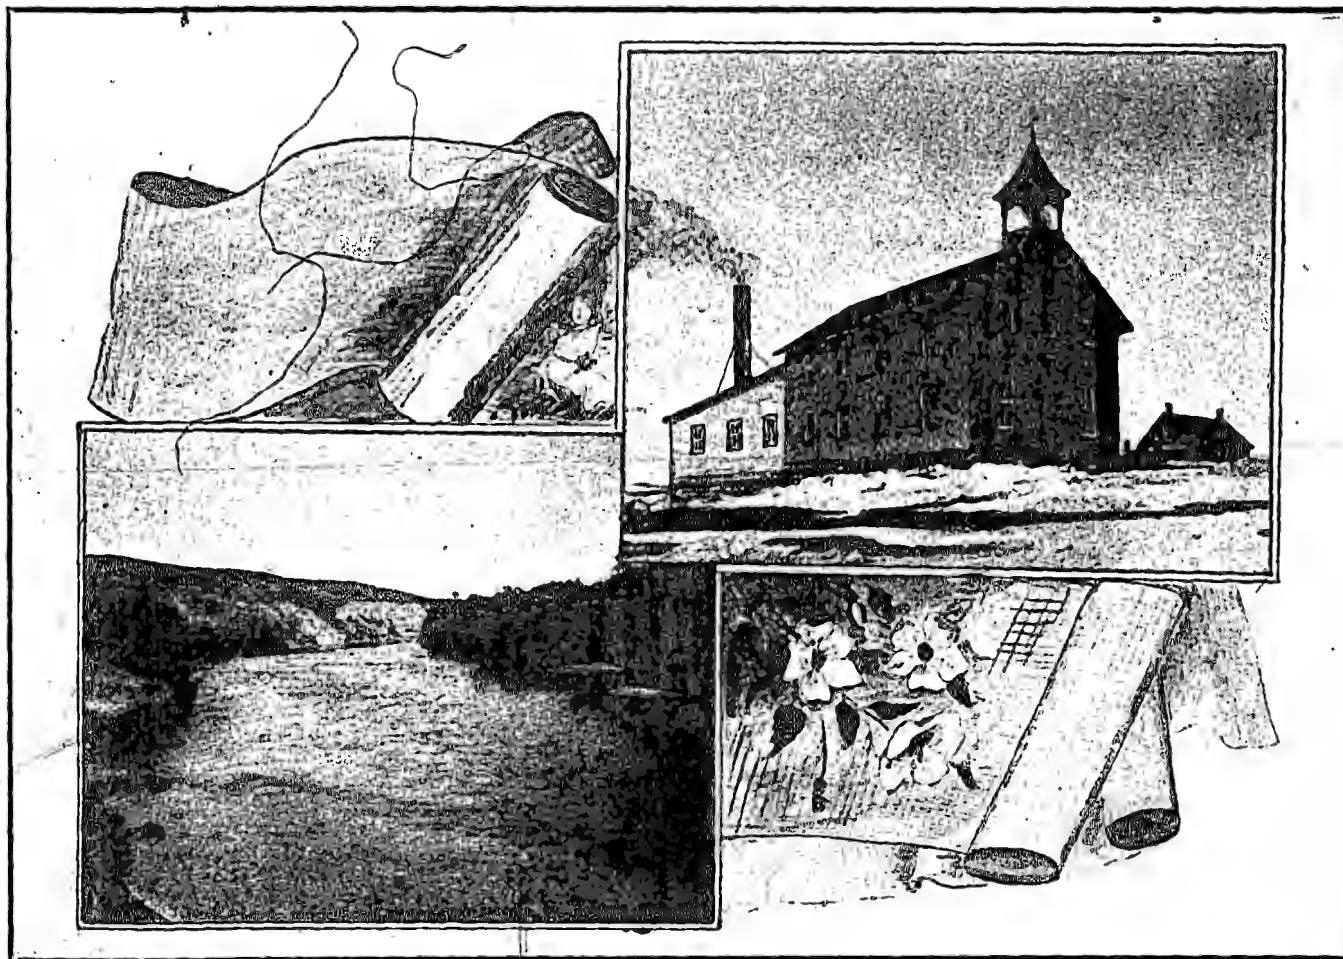

Mr. R. A. Nelles, solicitor, is one of Rapid City's best known and highly respected citizens. He has been practising here since 1881 and has a large practice. Besides this Mr. Nelles deals extensively in real estate and has many choice farms for sale in this vicinity. See page 68.
